MAWSS Receives Environmental Stewardship Award

MAWSS' Malcolm Steeves and Paul Klotz from Thompson Engineering hold the awards that were presented at the PEP annual meeting, April 16, at the 5 Rivers Delta Center

Mobile Area Water and Sewer System (MAWSS) and Thompson Engineering were recognized by Partners for Environmental Progress (PEP) with an Environmental Stewardship Award for the state-of-the-art grease waste treatment facility located at the Wright Smith Jr. Wastewater Treatment Plant. The special facility was designed to handle grease trap waste from restaurants. Prior to having the facility, all such waste was being treated in digesters at the C.C. Williams Wastewater Treatment Plant. The award was presented at the PEP Annual Meeting and Awards Program, April 16, at the 5 Rivers Delta Center.
