Heavy Rains Cause Sanitary Sewer Overflows

Mobile Area Water & Sewer System (MAWSS) experienced sanitary sewer overflows as a result of heavy rainfall and flooding in the Mobile area that began on September 27. Rain gauges measured more than eight inches within a fourteen hour period in some areas. With the ground heavily saturated, more rain is likely to trigger additional overflows. The locations and receiving waters are listed below.

<u>LOCATION</u>	<u>ESTIMATED GALLONS</u>	<u>RECEIVING WATER</u>
766 JOHNSTON AVE.	22,000	ESLAVA CREEK
