MAWSS Building New Lift Station to Alleviate Overflows

Contractors for Mobile Area Water & Sewer System (MAWSS) will start work this fall on a new lift station that will help alleviate sanitary sewer overflows caused by heavy rains in the Three Mile Creek area near Bizzell and Pecan Streets. This area has been a frequent site of sanitary sewer overflows during heavy rain events.

Monday, the MAWSS Board accepted the recommendation of Constantine Engineering and awarded a \$1.1 million construction contract to Construction Labor Services, Inc. to build the facility.

Construction is expected to begin in November and will take about nine months to complete. The site is located between Bizzell Street and Dr. Martin Luther King Avenue.
