Update on Water Main Break

Crews from Mobile Area Water & Sewer System (MAWSS) have located a break in a 10-inch water main that caused low water pressure and water outages in the Cottage Hill and Hillcrest Rd. area. The break believed to have been caused by lightning, is located in a wooded area between Hillcrest Rd. and Lloyds Lane just north of Girby Rd. Water has been rerouted to service the west Mobile area that was impacted by the break. Crews anticipate having the main line fixed later today.
