Water Main Repaired

Crews from Mobile Area Water & Sewer System (MAWSS) have repaired a break in a 10-inch water main that caused water pressure and outage problems in west Mobile yesterday. A lightning strike is thought to be the cause of the split in the line that was estimated to be between 6 and 10 feet long. The break occurred in a wooded area between Hillcrest and Lloyds Lane, just north of Girby Rd. Crews will be flushing lines today. Customers should contact MAWSS' Customer Care Line at 694-3165 if they notice any water discoloration.
