**Addendum #3 - IFB 25-032 Purchase & Install Flocculators for Stickney WTP**

Prospective Bidders:

The above solicitation is amended as set forth below; bidders **MUST** acknowledge receipt of this addendum. **Please sign & return this form with your sealed bid.**

**Answers to questions/comments received:**

1. Can the impeller and shaft be disposed of?
  - a. Yes, MAWSS wants to keep the equipment above the base plate (gear box, motor, etc.), but the impeller and shaft may be disposed of.
2. Can we have pictures of the Basins without water?
  - a. Yes, attached are the photos that we have.
3. Can we have a list of manufacturers and contacts that have been reached out to for this bid?
  - a. List of vendors provided below. Other manufacturers will be considered for equivalency.
    - i. Danhart (Philadelphia)
    - ii. Morrow Water (Ekato)
    - iii. Southern Water Technology (Mixtec)
4. Do the VFDs need to be enclosed in a box or have a sunscreen for the display?
  - a. VFDs should be provided in an enclosure with cooling, as required, per specification section 26 29 23-10, paragraph 2.8. And the operator interface should have a weather protective cover over HMI display per paragraph 2.4.
5. 01 61 03 Common Work Results for Equipment, Article 1.2.B references requirements for a "Suppliers' Vibration Analyst". Detailed vibration analysis such as this is occasionally required for agitators operating above 200 rpm, but is uncommon at 24 rpm. Please confirm that this specification applies to these low speed flocculators.
  - a. Yes, requirement will apply since the motors have an anticipate RPM of 1,200 or 1,800 RPM.
6. No bid bond is required.
7. Addition of the Additive alternate to raise the motor so the oil drain line is a minimum of 18" off of the concrete pad and to maintain all other specifications as written.  
Updated bid sheet attached.
