Rev 06/14/13

GENERAL CONTRACTOR INFORMATION

Company Name: _____	Date Needed: _____
Billing Address: _____	Contact Person: _____
_____	Phone Number: _____
_____	Meter Size Requested: _____

Service Location: _____

Check One:

Construction Meter allows contractors the benefit of being billed for water used during construction rather than being billed the preset minimum range dictated by the meter size.

An estimated date of completion will be: _____ / _____ / _____.

If the meter is needed for longer than the anticipated date of completion, the contractor shall contact MAWSS to advise of the extended time needed.

Temporary Meter allows MAWSS to install, for a pre-established time period, a water meter on service lines that are pending acceptance by The Board of Water and Sewer Commissioners of the City of Mobile. This meter is to be used during the construction phase, of a house, independently metered apartment complex or shopping center, for testing the plumbing and/or any type of construction requiring water usage.

This meter is not intended for the purpose of supporting normal daily usage. The transfer of the account to the property/business owner shall not occur until payment of all outstanding MAWSS invoices, Board acceptance of facilities (where applicable) and a C/O has been issued.

In either case; the billing will not be less than the minimum monthly billing for a 5/8" meter and both require payment of all applicable fees, before the meter can be installed.

MAWSS is not obligated to provide permanent service to a customer where water and/or sewer facilities have not been accepted by The Board of Water & Sewer Commissioners of the City of Mobile.
