

Customers:

As of January 6, 2003, all connections or increases in discharge, to our sewer system must be reviewed and approved before service can be sold. We apologize for any inconvenience this may cause but this is in an effort to serve our community better by staying in compliance with the Environmental Protection Agency (EPA) and Alabama Department of Environmental Management (ADEM).

Sewer Reservation Application:

To be served with sewer, capacity availability must be certified before service can be purchased.

Please fill in as much information as you can on the next pages to be considered for certification.

Application Fee: (payable at the time of application submittal)

Make Checks Payable To: Mobile Area Water Sewer System OR MAWSS

Private Residence.....	\$25.00
Commercial Development.....	\$150.00 per building
Proposed subdivision, apartment complex, condominium, mobile home park.....	\$600.00
Industrial Development.....	\$1500.00

Certification may take 2 to 4 weeks

Certification is only good for 120 days from date of approval.

Sewer Capacity Reservation:¹

Once the property has been certified, water and/or sewer service can be purchased, and installation procedures can begin.

If construction is not to begin within the 120 days of date of approval, the sewer capacity can be reserved by payment of the sewer capacity fee.

25% of the capacity fee can be purchased to reserve sewer capacity for up to 2 years. If construction or usage falls within the time frame purchased, then that portion will be credited on the remaining capacity fee due.

If construction does not begin within the 2 years, a refund can be made for any vacant lot minus a 10% holding fee.

100% of the capacity fee can be paid to reserve sewer capacity indefinitely. If not paid, a new capacity reservation application will be required when service is requested.

¹ If construction is in a subdivision that is currently under development, the information above does not apply.
